

Dear Parents and Carers,

To support the implementation of the requirements under **Benedict's Law**, we are reviewing and updating our student allergy and dietary records.

Although the Trust already operates robust procedures for managing allergies and medical conditions, the new legislation requires schools to ensure that allergy information is fully up to date and appropriately documented.

If your child has any allergies, food intolerances, or dietary requirements, please ensure the following information is provided no later than Thursday 17th September 2026:

- **Update Student Records** – Inform the school office of any food allergies, medical allergies, intolerances, or dietary requirements if you haven't already done so.
- **Individual Healthcare Plan** – If applicable (particularly for new students), provide an up-to-date Individual Healthcare Plan completed and signed by an appropriate healthcare professional.
- **Adrenaline Auto-Injectors (EpiPens)** – Where prescribed, provide two in-date, clearly labelled Adrenaline Auto-Injectors for use in school.

Please ensure that all documentation and any required medication are provided to the School First Aid Office **no later than Thursday 17th September 2026**.

Thank you for your continued support in helping us maintain a safe environment for all students.

Yours sincerely

Miss N Munawar
Vice Principal - Pastoral
